

VESSEL

Let us think.

New

SCAFFOLD WORKER SOCKET
〈JAWS LOCK〉

No.MLS20179

Patented

Use with

40V
(also 18V)
power tools

***New solution
for rounded
bolts and
nuts.***

Good even for such rounded nuts!

A/F **17** mm

For scaffold clamps

Unique-design socket shape

The bolt or nut, even rounded, can fit into the newly designed socket which has a wide area of contact. The JAWS LOCK, VESSEL's unique jagged forging process, catches the rounded edges of such bolt or nut, when loosening.

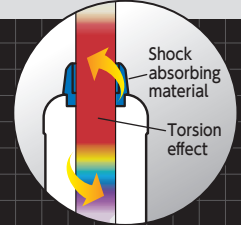

Can tighten the rounded bolt or nut because of the wide surface contact area.

Jagged

Shank with shock absorbing material

Torsion effect and shock absorbing material prevent the shank breakage. 5 times more durability than our conventional socket LAS20179.

Example of dedicated POP display materials. (Please contact our sales person for more detail)

▼ Shelf Wobbler W70×H170mm

▼ POP Display for Hanging Strip W80×H80mm

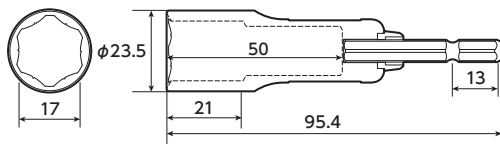

Hanging Merchandise Strip Display ▶ W37.5×H600mm

*The design and other specifications may be subject to change without notice.

Hexagonal surface contact that has never existed. Applied to any hex bolt and nut.

No. MLS20179 Scaffold Worker Socket (JAWS LOCK)

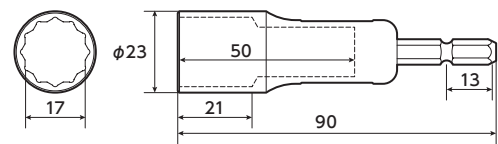

Model No.	A/F (mm)	O/D	OAL (mm)	Size (incl. card) (mm)	EDP No.
MLS20179	17	23.5	95.4	151×35×23	486275

Inner Ctn.:5pcs, Outer Ctn.:100pcs

Easy fitting dodecagonal socket. Remarkably improved workability.

⚠ Cautions

- Carefully read the instruction manual of the power tool before use.
- Be sure to wear protective goggles when working.
- Make sure to shut off the power source when installing or replacing the bit.
- Do not use if any abnormality such as cracking, chipping, wear or deformation is found.
- Never allow idle rotation by attaching to a power tool.
- Do not use for objects that have electricity flowing through them.
- Do not modify.
