

Optimum Design

for VESSEL's rechargeable screwdriver!!

Can store the 220USB screwdriver!!
Stylish storage.
Smooth handling.

2-way attachment

(TPH-10, TPH-40, and TPB-10)
Metal hook enables to attach the holder easily by a single process.

*The metal hook is for a quick and simple attachment. Use the belt loop to attach the holder more securely, if there is a risk of a fall accident.

D-shaped ring

(TPH-10, TPH-40, and TPB-10)
Drop-prevention wires, carabiners, and other fitting can be attached.

Belt loop

*Compatible with belt width 60mm or less.

Diagonal notch

(TPH-10, TPH-40, and TPB-10)
The screwdriver can be stored and taken out smoothly.

Mesh structure

(TPH-10, TPH-40, and TPB-10)
The 220USB can be recharged while it is stored in the screwdriver holder.

Compared to commercial products, the temperature rise of the holder is small. This can improve the life of the rechargeable battery of the 220USB.

Temperature rise test (compulsory test)

With this test, we see the temperature rise of the screwdriver holder when the 220USB was left running for about 40 minutes in it. The result tells that because of aeration property of the mesh fabric, VESSEL holder suppresses temperature rise, compared to other brands.

Temperature change of the driver holder

In pursuit of individuality and convenience.

2 types of screwdriver holder, suitable for various applications.

No. TPH-10

Screwdriver Holder (Screwdriver 1pc)

- Can be charged while the 220USB is stored.
- With a metal hook that can be "retrofitted".
- With D-shaped ring.
- 2 replacement bits can be stored.

Model No.	Weight (g)	Product size (mm)	EDP No.
TPH-10	168	260×85×50	148701
